

Methods and Initial Results

Nora Nickels

5/7/2018

Methods

Theoretical Model

- Define the model (but don't reproduce the literature review - you'll link these together in the final paper)

Variables

- Map variables to theoretical constructs

Data

Data collection

- Describe the data and how to obtain it
- Describe data collection procedures

Summary Statistics

- Summary statistics for key variables

Data Analysis

- Define the methods used to analyze the data

Results

- Present initial (tentative results)
- Use tables and figures as appropriate
